Establish priorities
Work iteratively with designers
Start building as soon as possible
Use real content

Lorem ipsum dolor sit

But in real life, these titles are much longer and might span multiple lines
Consider real-life workflows
Where are page elements coming from?
Use a contributed base theme

- Foundation
- Bootstrap
- Omega
- Zen
Don’t use a contributed base theme
Create your own base theme
Use coded deliverables as a model
JavaScript the Drupal way
Code scans and audits after Drupal build
Don't forget accessibility

- http://wave.webaim.org
- http://www.508checker.com
Thank you
